Work Experience

DATA ANALYST – Freelance Dec 2024 – Oct 2025

- Delivered a personalized Power BI training session to an aspiring data analyst, focusing on basic concepts like data import, data modeling, and building interactive dashboards.
- Helped them build their portfolio by guiding them through real-world examples and hands-on project work.
- Consolidated customer orders from unstructured sources (Instagram DMs, WhatsApp messages) into a **structured Excel dataset.**
- Designed a **Star Schema** data model to track customers, products, and order transactions efficiently.
- Built an interactive **Power BI dashboard** showing sales trends, top-selling items, and customer patterns.
- Structured the Excel file for **manual data entry** with clear columns and validation rules, allowing non-technical users to update new orders easily.
- Delivered **a user guide** for data entry and report refresh to ensure long-term usability.
- Performed extensive **data cleaning** on inconsistent datasets by handling missing values, correcting errors, and removing duplicates.
- Developed a **data standardization framework** to unify inconsistent formats (e.g., date formats, text casing, category naming) for reliable analysis.

ASISTANT MANAGER, POWER BI DEVELOPER – Mercedes-Benz Malaysia May 2024 – Oct 2024

- Developed and maintained business-critical dashboards and reports in **Power BI**, tracking key performance indicators (KPIs) across sales funnels, campaign performance and operational processes and ensuring data clarity for cross-functional stakeholders.
- Collaborated in an **Agile** development environment, aligning report delivery with bi-weekly sprints and stakeholder priorities in **Asana**.
- Engaged with regional teams to gather requirements, model data and deliver interactive dashboards, enabling **data driven decision making** across multiple business units.
- Utilized **Azure Databricks** and **Power BI Integration** for scalable data processing, contributing to early-stage data pipeline design and data model optimization.
- Ensured alignment with corporate brand standards by implementing best practices in data modelling and visualization.
- Authored user-facing release notes and training documentation to support successful dashboard adoption.
- Exposure to **SQL** and **Python** for data extraction and transformation *(in progress)*, building foundational capabilities to support more advanced BI solutions.

EXECUTIVE, ACCOUNT RECEIVABLES – Mercedes-Benz Services Malaysia Dec 2023 – April 2024
Singapore Market

- Performed analysis on incoming payments and created a real-time dashboard to identify trends and patterns for areas of improvement, resulting in increased process efficiency and decrease in payment reallocation request.
- Cleared backlog for unidentified payment by compiling, analyzing, and creating master data repository based on SAP transaction history data for quick and informed decision-making.
- Performed AML checks for the early settlement bucket in accordance with AML guidelines. Prepared AML guidelines and checklists for the MY Team, aligned work with the Compliance team, and cross-checked practices with other financial institutions to ensure consistency and compliance.
- Developed and implemented process improvements on auto allocation via RPA, resulting in a shortened time for payment verification and reduced errors in allocation.

EXECUTIVE, WHOLESALE ANALYST Jun 2019 – Dec 2023
Malaysia Market

- Created an interactive dashboard in Excel to monitor wholesale portfolio performance and use as forecast meter for wholesale collections. Utilized statistical analysis method to identify trends and patterns in the data.
- Prepared monthly reports and presentation decks with a strong focus on wholesale and cash management for the Malaysian and Singaporean markets for stakeholders.
- Worked with cross-functional teams and brand partners to gather requirements, analyze, text and share insights for new wholesale financing project across India, Thailand and Japan.
- Achieved zero payment delinquency for nine months in major wholesale activities. Maintained strong communication with dealers, resulting in an 85% DSI for 2021.
- Collaborated with cross-functional teams to identify recurring issues in cash management processes and develop process improvements and temporary workarounds, resulting in a significant reduction in backlogs for three critical processes.

EXECUTIVE, CASE XEV MARKET RESEARCH – Mercedes-Benz Malaysia Nov 2018 – Apr 2019

- Conducted in-depth market research on electric vehicles (EVs) across Southeast Asia and General Distributors, analyzing factors such as taxation, incentives, infrastructure, competition and political environment.
- Performed secondary research through social media analysis and virtual interviews with dealers to understand customer preferences and validate findings.
- Delivered reports on EV market potential, readiness and growth opportunities.

Skills

- **Data Tools & Software:** Microsoft Excel, Power BI, Azure Databricks, Jupyter Notebook, Tableau
- **Programming & Query Languages:** SQL (Microsoft SQL Server, MySQL), Python (Pandas, NumPy, Matplotlib), DAX
- **Data Analytics & Reporting:** Data cleaning, KPI dashboards, funnel analysis, campaign performance tracking, sales reporting, telecom billing analysis
- **Business Intelligence:** ETL workflows, data modeling, Power Query transformations, interactive slicers, text input handling, dynamic DAX measures
- **Data Governance & Security:** Data quality monitoring, access controls, compliance awareness
- **Language:** English, Malay

Education

BACHELOR OF MARKETING (HONS) – Universiti Utara Malaysia (UUM) Nov 2018
LCCI – Level 2 Certificate in Book-keeping and Accounts Nov 2012

Certifications

GOOGLE DATA ANALYTICS – Coursera/Google Issued – Feb 2023
DATA ANALYSIS WITH R PROGRAMMING – Coursera/Google Issued – Jan 2023
ANALYZE DATA TO ANSWER QUESTONS – Coursera/Google Issued – Nov 2022

Projects

FINANCIAL STATEMENT ANALYSIS – Case Study Jun 2025

- Built a comprehensive financial dashboard in **Power BI** to analyze actual income, expenses, and budget variances for a SaaS company.
- Assessed profitability trends, identified top revenue sources, major cost drivers, and key deviations from budget to support data-driven decision-making.
- Delivered strategic insights on revenue patterns, seasonal impacts and cost optimization opportunities.

TELECOM BILLING ANALYSIS – Case Study Apr 2025

- Built a **Power BI** report using **SQL**-based telecom billing data to analyze client profitability and rate performance.
- Delivered a professional presentation with key findings and actionable recommendations to support strategic billing improvements.

MARKETING CAMPAIGN ANALYTICS – Personal Project Mar 2025

- Simulated email campaign data in **Python** and built a **Power BI dashboard** to analyze open rates, click-throughs, and conversions.
- Identified engagement trends and key factors influencing campaign success.

HR ANALYTICS DASHBOARD – Personal Project Nov 2024

- Built an interactive **Power BI dashboard** to analyze HR metrics like turnover, tenure, and diversity.
- Used **Power Query for data cleaning and transformation** to ensure accurate, stakeholder-ready insights.

BENS PIZZARIA – Personal Project June 2023

- Explored sales and order data using **SQL**, then validated and visualized results using **Excel charts** and **Pivot tables**.

SAMPLESUPERSTORE SALES ANALYSIS – Personal Project Feb 2023

- Cleaned and modeled Excel data using **SQL** and **Power Query**, then built an interactive dashboard with Power Pivot and Pivot tables.
