FATIN SYAHIRAH BINTI MOHD HISHAMUDDIN

BUSINESS ANALYST

+60172836072 | fasyahirah98@gmail.com
Kuala Lumpur, Malaysia

PROFESSIONAL SUMMARY

Business Analyst with extensive experience in financial institutions, specializing in user requirements, project documentation, and stakeholder engagement. Proven success in leading UAT and SIT testing, achieving high defect resolution rates. Skilled in standardizing documentation, client training, change management, and team mentoring to deliver high-quality results on time.

EXPERIENCE

SENIOR BUSINESS ANALYST **May 2023 – Present**
JURISTECH SDN BHD

- **User Requirements Gathering & Management**: Led and facilitated user requirement sessions to gather insights and provide effective solutions. Successfully identified out-of-scope items and managed them by offering workarounds. Ensured timely communication by sending the Minutes of Meeting (MOM) within 24 hours of each session, keeping all stakeholders informed and aligned.
- **Solution Coordination & Delivery**: Directed business analysts, solution architects, and software engineers through solution walkthroughs and gap analysis. Successfully delivered two major projects to go-live on schedule with minimal production issues.
- **UI/UX Collaboration**: Partnered with development teams and UI/UX designers to create intuitive, user-focused interfaces, ensuring alignment with usability principles. Reviewed mockups and provided constructive suggestions, reducing minor adjustments during UAT by 70% and streamlining the overall development process.
- **Stakeholder Engagement & Communication**: Served as the primary point of contact for communication between users and the project team, ensuring seamless collaboration and alignment with project objectives. Managed daily stand-ups, PWC meetings, defect sessions, and gap sessions, facilitating effective communication and issue resolution across teams and stakeholders.
- **Project Planning & Resource Optimization**: Developed precise gap quotations and man-day estimations, enabling accurate project planning. Effectively managed tasks, tracked progress, integrated UI/UX considerations, and estimated effort during sprint planning to ensure timely delivery.
- **Business Documentation & Requirement Analysis**: Authored 10 Functional Specification Documents (FSDs) within 1.5 months, securing early signoffs. Successfully extracted requirements from Business Requirements Documents (BRDs) and accurately captured them in the FSDs, ensuring clarity and alignment with project goals.
- **Project Analysis & Process Standardization:** Led in-depth analysis with the operations team on end-to-end project delivery processes and created standardized formats for Functional Specification Documents (FSDs), Test Strategies, Test Scripts, and Interface Analysis (IFA). These standards were successfully implemented and adopted across projects, enhancing consistency and efficiency in documentation company wide.
- **Testing & Quality Assurance**: Led desk checks during the development phase and reviewed test scripts before release to users. Directed User Acceptance Testing (UAT) and System Integration Testing (SIT), achieving a 90% defect resolution rate prior to release. Successfully completed both SIT and UAT on time, ensuring high-quality system delivery.

- **Client Training & System Adoption**: Prepared training materials and successfully conducted five major training workshops, receiving positive feedback and achieving an 80% system adoption rate.
- **Team Leadership & Mentorship**: Mentored team members in FSD preparation, testing, and documentation. Through tailored coaching, helped team members enhance their skills and performance, leading to a promotion for one subordinate as their potential and capabilities were recognized.

PROGRAMMER ANALYST **September 2022 – April 2023**

COGNIZANT

- **Design Reviews & Validation:** Contributed to 8 design reviews and walkthroughs for payment features, providing actionable feedback and ensuring system designs aligned with both business and technical requirements. Helped identify 3 design inconsistencies, preventing potential issues during implementation.
- **Test Script Development & Execution:** Created and executed 25 test scripts daily, focusing on accuracy and performance according to business requirements and functional specifications.
- **Progress Monitoring & Defect Resolution**: Monitored the execution of over 2000 test cases and collaborated with IT System Analysts to address and resolve 100+ defects, ensuring timely resolution and preventing delays in project timelines.

ASSOCIATE BUSINESS ANALYST **March 2021 – August 2022**

HITACHI EBWORX

- **User Requirements Management:** Analyzed user requirements for banking payment solutions, recommending effective solutions aligned with customer needs and regulatory standards. Actively participated in discussions and provided summary reports to senior stakeholders.
- **Test Script Creation:** Developed and executed 25+ test scripts daily, ensuring accuracy and compliance with business requirements and financial standards for payment systems. Conducted extensive testing, including Vendor System Integration Testing (VSIT), System Integration Testing (SIT), User Acceptance Testing (UAT), and regression testing for iOS and Android applications to ensure performance and security.
- **Documentation & Design:** Served as the primary reference for FSD, incorporating detailed UI/UX guidelines to enhance usability and design consistency. Provided over 100+ mock screens to developers, offering clear visual references that ensured minimal bugs during the development phase and improved user satisfaction with the final product.
- **Client Workshops & Presentations**: Led workshops and presentations for banking sector clients to explain and showcase payment solutions. Also conducted internal training sessions to ensure a smooth transition to the production team, facilitating seamless implementation and knowledge transfer.
- **Defect Management & Reporting**: Successfully sent daily reports to stakeholders and tracked defects related to payment features using JIRA. Achieved a 100% resolution rate according to SLA, ensuring timely issue resolution and system stability.
- **UAT Support and Validation**: Assisted business users in validating payment systems during UAT for 2 major releases, ensuring seamless integration and a smooth transition to production.

EDUCATION

BACHELOR OF COMPUTER SCIENCE (ARTIFICIAL INTELLIGENCE)
