Jeremy Jordan Anak Jutim

Business Analyst with over 2 years of experience in gathering requirements, analyzing processes, and delivering solutions that align with business goals. Graduated with a Bachelor's degree in Information Technology (Hons), majoring in Software Quality and minoring in Corporate Management—bringing a strong blend of technical understanding and business insight.
Experienced in working closely with cross-functional teams to translate business needs into clear, actionable deliverables. Involved in various stages of the project lifecycle, including stakeholder engagement, documentation, testing support, and solution rollout. Recognized for being detail-oriented, communicative, and proactive in fast-paced environments.

Experience

AUGUST 2023 - PRESENT
Vistra | Orisoft Sdn Bhd I Kuala Lumpur

Business Analyst

- Managed payroll system compliance for both Malaysia and Singapore, with Malaysia contributing the majority of clients and revenue. Served as the primary point of contact for both Malaysia and Singapore, ensuring adherence to regulatory standards set by respective government authorities.
- Collaborated with internal teams and external stakeholders to gather requirements and implement changes, supporting seamless payroll operations and statutory compliance.
- Partnered with project stakeholders to conduct user feedback surveys, gathering insights to inform future product enhancements.
- Collected, analyzed, and documented business requirements through user stories, process flows, and use cases, while recommending practical, value-driven business solutions.
- Utilized Jira for task tracking and sprint management, Excel for data analysis and reporting, and SQL for querying payroll-related data to support decision-making and reporting.
- Followed Agile methodology with sprints to facilitate continuous feedback and iterative development, delivering value incrementally.
- Facilitated discussions with software developers and testers to deliver cost-effective solutions within defined release timelines.
- Developed and maintained clear and complete requirements documentation throughout the project lifecycle.

SEPTEMBER 2021 - APRIL 2022
PETRONAS Digital Sdn Bhd I Kuala Lumpur

Business Analyst/Quality Assurance Intern

- Led the implementation of the e-PTW system for PRSB, ensuring smooth integration with existing workflows.
- Facilitated expedited system development, ensuring on-time delivery to the business team.
- Proficient in both independent work and collaborative team environments, adapting to different project needs.
- Conducted thorough analysis of user stories and requirements to validate feasibility and alignment with business goals.
- Skilled in identifying and tracking software defects, performing various testing levels including System, Integration, Business Acceptance, User Acceptance, and Regression.
- Delivered timely solutions and comprehensive support documentation to end-users, improving software quality and enhancing user experience.
- Provided dedicated support for OPU, ensuring seamless operations and process alignment with project objectives.

Projects and Achievement

1. Final Year Project 2023: Development of Smart Monitoring System in a Secured Area using Internet of Things (IoT)

- Developed a Smart Monitoring System using IoT to detect real-time threats and environmental risks, with advanced sensors for efficient data processing.
- Created a sensor-based system that distinguishes human from non-human movement by classifying heat signatures, applicable in security and wildlife monitoring.
- FYP Gold medal awards 50th Science and Engineering Design Exhibition (SEDEX50)
- Bronze medal 6th International Innovation, Design and Articulation (i-IDeA TM 2023)

2. Technopreneurship Team Project: Floody: Flood Warning System (2022)

- Develop the technical and coding part of the project using Arduino UNO to ensure efficient and functional hardware and software components.
- Create a user-friendly and visually appealing interface for mobile applications to enhance user engagement and satisfaction.
- Implement and optimise the technical and coding components of the project using Arduino UNO, leveraging the platform's capabilities to achieve project objectives.

3. STEM (Science, Technology, Engineering & Math) Waves 2019 at Perak

➢Committee

4. National Cyber Games 2017

➢Head of Department Activities and Games.

- Develop a comprehensive tournament schedule that encompasses group stages and elimination stages.
- Manage online group stages and LAN elimination stages, including scheduling matches, coordinating with teams and ensuring fair play.
- Establish and enforce tournament rules and regulations to ensure fair and safe competition for all teams involved.

5. UTP SEDEX 38 Open Innovation Challenge

➢Bronze Award with project title "Card Pocket Application."

- Designed and prototyped Card Pocket, a mobile app for storing loyalty card details and replacing physical cards with smartphones.
- Developed app features such as promotion checking, accumulated loyalty points tracking, and shop location services, to provide users with a convenient and easy-to-use experience.

6. MPU4 PROJECT: GREEN YOUTH DAY AND POVERTY ERADICATION 2017

➢Treasurer of the project

- Conducted 'Green Youth Day & Poverty Eradication' event in conjunction with MPU4 Community Service course, focused on youth education in climate change and poverty eradication, at Sekolah Kebangsaan Pasir Gajah, Perak.
- Organized and executed various engaging activities during the 'Green Youth Day & Poverty Eradication' event such as aerobics, organic fertilizer demonstration, gotong-royong, and tree planting to educate youth on environmental conservation and poverty eradication.
