Muhammad Aiman Bin Ahmad Saidi
(Mechanical Engineering Graduate)

+60 19–430 5977 | aimansaidi2000@gmail.com |
https://www.linkedin.com/in/aimansaidi

SUMMARY

Detail-oriented and proactive mechanical engineering graduate with hands-on experience in document control, contractor coordination, and compliance monitoring in building maintenance projects. Skilled in handling technical documentation, verifying interim payments, and ensuring adherence to project specifications and quality standards. Eager to contribute in roles involving quality assurance, documentation management, or technical coordination.

EDUCATION

Universiti Teknologi MARA (UiTM) Shah Alam — **Shah Alam, Selangor**
- Bachelor of Engineering (Hons) Mechanical — **Sept 2019 – Aug 2023**
- CGPA: 3.25

Universiti Teknologi MARA (UiTM) Dengkil — **Dengkil, Selangor**
- Foundation in Engineering — **July 2018 – Feb 2019**
- CGPA: 3.78

SMKA Slim River — **Slim River, Perak**
- Sijil Pelajaran Malaysia (SPM) — **2013 – 2017**
- 2A+, 3A, 1A-, 3B+, 1B, 1C+

WORK EXPERIENCE

Sutracom Sdn. Bhd — **Shah Alam, Selangor**
(Protégé – Mechanical Engineer, Placement: JKR Cawangan Kejuruteraan Mekanikal Selangor) — **Dec 2024 – Present**

- Involved in four building maintenance projects, one involving escalator works and three involving elevator replacement works.
- Attend monthly site meetings and conduct site visits to monitor progress and compliance.
- Coordinate with main contractors on technical documentation including material approvals, shop drawings, and any review and approval from JKR.
- Responsible for verifying and processing interim payment claims submitted by contractors in accordance with contractual milestones and site verification.
- Ensure all works comply with JKR standards and contract specifications.

Panasonic Appliances Air-Conditioning Malaysia Sdn. Bhd — **Shah Alam, Selangor**
(Internship) — **Aug 2022 – Oct 2022**

- Inspected components like coils, fans, and overall outer parts of unit for manufacturing defects, damages, and irregularities.
- Ensured that units met aesthetic and customer presentation standards by evaluating their overall appearance, finishing, and packaging.
- Maintained accurate records of inspection results for each unit.

ACHIEVEMENTS

- **Dean's List Award** — **July 2021 – Aug 2023**
  Part: 4 (3.51) and 8 (3.77)

ACADEMIC PROJECTS

Development and Characterization of Biocomposite Bamboo Particles Reinforced PLA Using Compression Moulding (Final Year Project) **Oct 2022 - Aug 2023**

- This project aimed to develop and characterize biocomposite materials by introducing bamboo particles into a polylactic acid (PLA) matrix using the hot compression moulding technique.
- Successfully solved the challenge of enhancing mechanical and thermal properties of biocomposites.
- Applied advanced manufacturing techniques and demonstrated expertise in materials science.
- Conducted in-depth research, data analysis, mechanical and thermal testing to optimize material performance.
- Managed project planning, scheduling, and team collaboration effectively.
- Achieved significant outcomes, notably enhancing the mechanical and thermal properties of the biocomposite.

Convertible Desk **Oct 2021 - Aug 2022**
(Integrated Design Project)

- Led the team as the second design engineer in creating significant product components, ensuring their functionality and aesthetic appeal.
- Engaged in various aspects of product development, including design, fabrication, and welding, ensuring a holistic approach to project success.
- Contributed creative problem-solving to enhance the product's usability and aesthetics, highlighting a knack for innovative design.
- Efficiently managed design tasks, ensuring on-time delivery and successful project completion.
- Worked on the interface of design with other departments, ensuring the seamless integration of all project components.

TRAINING AND CERTIFICATES

- Certified Scholar for Peneraju Skil Automotive Industry Certification Engineering-Digital Engineering Prototyping (AICE-DEP) Cohort 1/2024. **Apr 2024 - May 2024**
- Fundamental of Acoustics CIDL-UiTM CGCT July 2023 Session **July 2023**

LEADERSHIP EXPERIENCE

Sungai Rek Mini Hydropower Project: A Case Study in Renewable Energy **Mar 2023 – Aug 2023**
Leader

- Led my team as group leader for the Sungai Rek Mini Hydropower Project, equipping my team with fundamental knowledge about the country's renewable energy technologies.
- Facilitated an understanding of the system's operation and its functionality.
- Led my team in assessing how this technology improves resource use and accessibility, emphasizing enhanced efficiency.
- Enabled my team to compare the advantages and disadvantages of the sustainable energy system.
- Fostered the evaluation of basic techno-economic concepts applied to analyse energy and environmental issues.

Carbon Reduction Project Appraisal (Felda Tower Headquarters) **Oct 2022 – Feb 2023**
Leader

- Guided a team as group leader for the Carbon Reduction Project Appraisal for Felda Tower Headquarters, assessing carbon reduction strategies.
- Distributed tasks among team members, fostering an environment of equal contribution and teamwork.
- Exhibited practical leadership skills by coordinating tasks and facilitating team collaboration.

Injection Moulding Design Development **Mar 2022 – Aug 2022**
Leader

- Designed a side gate two-plate injection moulding system using CATIA V5.
- Led the project as the team leader, taking on a crucial role in coordinating and guiding the team through the injection moulding design process.
- Fostered collaboration within the team, ensuring smooth communication and division of tasks to achieve project milestones.

- Addressed and resolved technical challenges and design issues that arose during the project, showcasing problem-solving skills and adaptability.
- Maintained comprehensive project documentation, including design specifications, progress reports, and project timelines, ensuring transparency and accountability.

SKILLS

Language: Malay, English

Engineering Software: CATIA V5, Arduino IDE, Autodesk Tinkercad, MATLAB-Simulink, and programming languages (C++, C)

Project Skills: Technical Documentation Handling, Document Control & Compliance, Contractor Coordination, Meeting Participation & Reporting, Project Compliance Monitoring

Editing: Canva, Wondershare Filmora

Other: Microsoft Office (Word, PowerPoint, Excel), Origin Lab
