WORK EXPERIENCE

PETRONAS DIGITAL SDN BHD (Tower 2 KLCC, Kuala Lumpur)

SENIOR BUSINESS ANALYST (August 2022 – Present)

- Conducted on-site 'train the trainers' sessions across Peninsular Malaysia (PMA), Sabah, and Sarawak, training 40 users per region to ensure consistent system knowledge transfer.
- Organized and facilitated workshops to gather comprehensive requirements from stakeholders, ensuring alignment with business objectives.
- Led User Acceptance Testing (UAT) sessions, overseeing testing procedures and validating system functionality.
- Provided sign-off on requirement documents, ensuring completeness and accuracy before project progression.
- Designed Proof of Concept (POC) and wireframes to visualize proposed system enhancements for stakeholder evaluation.
- Developed Business Requirements Document (BRD) and detailed process flow diagrams to document project requirements effectively.
- Created user stories in DevOps environment to articulate detailed system requirements and streamline development processes.
- Facilitated daily stand-up sessions to synchronize team efforts, track progress, and address project milestones proactively.

Achievement:

- Successfully nominated the product for exhibition at One Connect, paving the way for potential commercialization across various Petronas departments.
- Received focused recognition for the project's successful delivery and deployment to end-users, highlighting effective project management and stakeholder collaboration.

COGDEV MALAYSIA SDN BHD-COGNIZANT (Menara Shell, Kuala Lumpur)

PROGRAMMER ANALYST (May 2021 – July 2022)

- Manual Testing Leadership: Executed rigorous manual testing for life insurance web applications in collaboration with a prominent bank, showcasing expertise in test case design and execution.
- Domain Specialization: Specialized in the insurance domain, ensuring compliance with industry standards and regulatory requirements for life insurance products.
- Collaborative Quality Assurance: Collaborated with cross-functional teams, addressing software defects and fostering a culture of quality to deliver high-caliber solutions.

CAPGEMINI MALAYSIA SDN BHD (Intermark, Kuala Lumpur)

SENIOR SOFTWARE ENGINEER (December 2020 - April 2021)

- Mobile Testing Leadership: Led manual and mobile testing efforts for a prominent bank's digital application on both Android and iOS platforms, ensuring application robustness.
- Testing Support and Expertise: Supported performance testing initiatives and played a crucial role in User Acceptance Testing (UAT), contributing to the optimization and validation of the digital application.

- Cross-Functional Collaboration: Collaborated seamlessly with cross-functional teams, addressing software defects promptly through System Integration Testing (SIT) and regression testing, ensuring the delivery of a high-quality digital solution.

ACCENTURE SOLUTION SDN BHD (Kelana Jaya, Selangor)

TEST ENGINEERING ANALYST (June 2020 - November 2020)

- Testing Expertise: Led testing initiatives by employing both Automation (Python, Selenium, Robot framework) and Manual Testing methodologies.
- Tool Proficiency: Utilized JIRA reporting tools to create test cases and generate detailed bug reports, ensuring a systematic and transparent testing process.
- Collaborative Approach and Continuous Learning: Collaborated with cross-functional teams to integrate testing into the development lifecycle. Maintained a commitment to continuous learning, staying updated on industry best practices and emerging trends in testing.

SONY EMCS (MALAYSIA) SDN BHD (Bangi, Selangor)

DESIGN ENGINEER (January 2020 - June 2020)

- Testing Leadership: Executed test cases for diverse releases, ensuring the quality and reliability of television applications, including Netflix, Prime and Amazon.
- Documentation Proficiency: Documented detailed and comprehensive test cases, providing clear guidelines for effective testing procedures.
- Manual Testing Expertise: Demonstrated proficiency in manual testing methodologies, contributing to the overall quality and functionality of television application.

IBM MALAYSIA SDN BHD (Damansara, Selangor)

SOFTWARE TEST ENGINEER INTERNSHIP (September 2018 - April 2019)

- Quality Assurance and Automation: Executed quality assurance using Java programming, emphasizing automation to enhance software reliability and streamline testing processes.
- Research and Legacy Cleanup: Conducted research on system approaches and successfully performed legacy defect cleanup activities, contributing to system efficiency.
- Tools Proficiency and Collaboration: Demonstrated proficiency in various testing tools and collaborated effectively in a professional environment, gaining exposure to real-world testing scenarios.

PROJECTS

UPSTREAM SYSTEM - SEALMRS AND EIAC (PETRONAS)

- End-to-End Testing: Ensured system reliability and performance through thorough end-to-end testing of web applications.
- Functional and Regression Testing: Contributed to project stability with comprehensive execution of functional and regression tests, ensuring overall quality assurance.
- Design and Requirements Management: Enhanced user interface and experience by designing wireframes and prototypes. Facilitated effective collaboration and communication through creating and managing user stories in DevOps for precise requirement gathering.

LIFE INSURANCE WITH BANK SYSTEM PROJECT (COGNIZANT)

- Comprehensive Testing: Conducted thorough testing of the Life Insurance with Bank System, covering both the web application and Excel file components.
- Bug Tracking and Test Case Management: Utilized JIRA for efficient bug tracking and systematic creation of test cases, ensuring a transparent approach to issue identification and resolution.
- Quality Assurance Contribution: Played a vital role in enhancing the overall quality and reliability of the project, contributing to its successful and high-quality delivery.

DIGITAL BANKING MOBILE TESTING (CAPGEMINI)

- Testing Leadership: Led manual System Integration Testing (SIT) and Regression Testing for the digital banking mobile application, ensuring robustness and reliability.
- Performance and UAT Support: Supported Performance Testing and User Acceptance Testing (UAT), optimizing application responsiveness and validating end-user expectations.
- Collaborative Quality Assurance: Collaborated effectively with cross-functional teams to address defects promptly, contributing to a high-quality and seamless digital banking mobile solution.

NEWSPAGE DISTRIBUTOR MANAGEMENT SYSTEM (ACCENTURE)

- Automation Development: Led the development of Python, Selenium, and Robot Framework automation code, optimizing testing efficiency for the Newspage Distributor Management System.
- Comprehensive Testing: Utilized Hana DB for rigorous database checking and Postman for API testing, ensuring data accuracy and seamless integration within the system.
- Bug Tracking and Quality Assurance: Implemented JIRA for systematic bug tracking and test case management, contributing to overall quality assurance and reliability of the Newspage Distributor Management System.

IPTV APPLICATION PRIME, NETFLIX (SONY)

- Comprehensive Software Testing: Conducted thorough testing of television software, including Prime, Netflix, and Amazon components within the IPTV Application.
- Bug Tracking and Test Case Management: Utilized JIRA for efficient bug tracking and systematic creation of test cases, ensuring a transparent approach to issue identification and resolution.
- Quality Assurance Excellence: Played a vital role in ensuring the overall quality and reliability of the IPTV Application, contributing to a seamless user experience through meticulous testing and bug tracking.

CONTRAIL & OPENSTACK OBSERVER AUTOMATION CODE (IBM)

- Java Code Development: Developed efficient automation code in Java, contributing to the enhancement of Contrail & OpenStack Observer systems.
- Integration with RabbitMQ: Implemented RabbitMQ for seamless job listening, ensuring effective communication within the automated system.
- Agile Deployment in Fyre VM: Successfully deployed the code in Fyre VM, practicing Agile methodology for flexibility and iterative progress in project execution.

EDUCATION

Universiti Teknologi PETRONAS (UTP) Tronoh, Perak

Bachelor in Information Technology (Hons) Graduation Date: December 2019 Major in Software Engineering, Minor in Corporate Management (CGPA: 3.26)

- Leadership and Extracurricular Involvement: Demonstrated leadership as Exco Welfare Department at Persatuan Seni Silat Cekak Malaysia (UTP) and contributed to the professional development of members as a Trainer at Syntech Club.
- Financial Management and Organizational Governance: Managed financial responsibilities as the Treasurer at the Annual General Meeting of Persatuan Seni Silat Cekak Malaysia (UTP), showcasing financial acumen and organizational governance skills.

CERTIFICATION

- Exam 463: Implementing a Data Warehouse with Microsoft SQL Server 2012/2014. *January 2018*

SKILLS & INTERESTS

Skills:

- Programming Languages: Proficient in Java for versatile software development and Python for automation and scripting.
- Testing and Quality Assurance: Expertise in both Automation Testing (Selenium, Robot Framework) and Manual Testing methodologies.
- Operating Systems: Competent in Linux/Unix environments for optimized system functionalities.
- Project Management: Skilled in project management principles for efficient planning, execution, and delivery.
- Design and DevOps: Proficient in wireframe design for intuitive user interfaces and experienced in DevOps management.
- Professional Competencies: Adaptable and versatile in utilizing a diverse set of programming languages and tools. Effective collaboration within cross-functional teams for successful project execution and delivery.

Interests:

- IT Business Analyst, Software Test Engineer, Automation Test Analyst
