EXPERIENCE

Intel Technology Sdn Bhd
TEST ENGINEER (TE) – ATM Assembly test Manufacturing **APR 2024 - OCT 2024**
Job Responsibilities:

- Managed end-to-end Class Test operations for Altera (FPGA) products, ensuring compliance with quality and test standards.
- Led test-retest, rescreening, and reject reclaim activities, contributing to yield recovery and waste minimization.
- Spearheaded high-volume FPGA production readiness, including test program qualification, pilot build validation, and production process definition
- Resolved on-hold lots by identifying root causes of test failures through comprehensive analysis of manufacturing and electrical test data and dispose accordingly.
- Collaborated cross-functionally with internal teams from Manufacturing, QA, Planner, Modules, NPI, and Test program team to ensure seamless processes and boost production efficiency during Class and EQA tests and test elimination

PRODUCT DEVELOPMENT ENGINEER (PDE)- MPE Manufacturing Product Engineer **OCT 2022-APR 2024**
Job Responsibilities:

- Led Class and EQA testing for Intel's Raptor Lake (client) and Sapphire Rapids (server) products, ensuring high-quality production releases and maintaining seamless production flow.
- Tagged run cards and executed pilot lot introductions using HDMX for newly released test programs, ensuring seamless integration into the production process
- Monitored and analyzed test program performance, identifying and resolving pre-release issues to improve test accuracy and efficiency
- Implemented yield enhancement, run-rate optimization, test time reduction, and DPM minimization strategies, leading to significant cost savings

Achievements:

- Received HVE PG Department Recognition for successful elimination of RPR8161 EQA test flow
- Received HVE PG Department Recognition for successful elimination of SPR112 AHMT test slow
- Recovered significant yield loss by executing reject reclaim procedure, reducing scrap and improving cost efficiency
- Recognized and rewarded by Altera for successfully supporting a last-minute test program release, ensuring timely deployment to production and maintaining seamless operations.

Celcom Axiata Berhad
Trainee IT release planner **MAR 2021-AUG 2021**
Job Responsibilities:

- Tracking and update change request progress daily to ensure timely and accurate deployment coordination
- Performed monthly release planning analysis using Excel PivotTables to track trends, optimize schedules, and support data-driven decisions
- Planned and coordinated software release schedules for communication platforms, ensuring timely delivery with minimal disruption to live services

Achievements:

- Successfully managed end-to-end software release planning and deployment for communication services, improving schedule accuracy and minimizing service disruptions through effective change tracking and data analysis using PivotTables

Trainologix International Sdn Bhd
Technician **JULY 2017 - SEP 2017**
Job Responsibilities:

- Assisted in designing and drafting software-generated drawings and plans for project development
- Supervised subcontractor activities, monitored daily site progress, and provided regular task updates
- Prepared and submitted technical reports to the project manager for site documentation and progress tracking

Achievements:

- Effectively supported project execution by producing technical drawings, supervising subcontractor work, and ensuring timely submission of site reports to maintain project progress and compliance

Tri System Technology Sdn Bhd
Trainee **DEC 2015 – MAY 2016**
Job Responsibilities:

- Assisted project executive in monitoring and tracking daily on-site activities to ensure work progress aligned with project schedules
- Prepared and compiled technical reports documenting site installation activities for project records and management review

. Achievements:

- Contributed to smooth project execution by monitoring daily site activities and delivering accurate technical reports to support installation tracking and project decision-making

TRAINING CERTIFICATE ATTENDED

- Crash course on Python by Coursera(Google Professional Training) (2025)
- CISCO IoT Fundamentals: Connecting Things Professional Certification (2019).

EDUCATION

Master of Electronic Engineering (Electronic Systems) **SEP 2021 – SEP 2022**
CGPA: 3.55 | University Technical Malaysia Melaka
Involvement and Achievements:
- Developed Final Year Project (FYP) titled *"Trust Evaluation in Cloud Computing"*, focusing on system reliability and data security
- Achieved Dean's List recognition for academic excellence with a CGPA of 3.55

Bachelor of Computer Engineering Technology (Computer Systems) **SEP 2017 – SEP 2021**
CGPA: 3.37 | University Technical Malaysia Melaka
Involvement and Achievements:
-Achieved Dean's List in Semester 4 and 7 for outstanding academic performance.
-Developed and presented Hardware Development of IC Tester for Digital Logic Gates, awarded Gold Medal at Innovation & Design Expo
- Elected as Welfare Executive under the Faculty of Engineering Technology Student Association
- Completed Cisco IoT Fundamentals: Connecting Things professional certification

Diploma of Electronic Engineering (Computer) **JUN 2014 - JUN 2017**
CGPA: 3.12 | Politeknik Sultan Idris Shah (PSIS)
Involvement and Achievements:
-Developed Smart Glove for the Visually Impaired as Final Year Project (FYP), aimed at enhancing mobility and safety through sensor integration

SKILLS & HIGHLIGHTS

- Test flow management
- Root Cause and Data Analysis
- Standard Manufacturing Procedures
- Technical expertise
- Problem-solving
- Quality Management
- Continuous Improvement Process

- Microsoft Offices [excel,word,powerpoint]

-Python, C/C++
- HTML CSS
- PHP
- ECAD PROTEUS
- AutoCAD
- MYSQL

- Fluent in Malay, conversational in English
