OBJECTIVE

Results-driven professional with expertise in Business Intelligence, Data Analytics, and Software Engineering. Skilled in transforming data into actionable insights, developing end-to-end reporting solutions, and building robust systems aligned with organizational goals. Adept at leveraging Power BI, SQL, and data warehousing to drive digital transformation and support business growth. **Able to start immediately.**

BACKGROUND STUDIES

UNIVERSITI KEBANGSAAN MALAYSIA – KAMPUS BANGI **OCT 2020 – AUG 2023**
Bachelor of Software Engineering (Multimedia System Development) Hons
CGPA: 3.60

POLITEKNIK METrO KUALA LUMPUR **JUNE 2017 – DEC 2019**
Diploma in Information Technology (Digital Technology) Hons
CGPA: 3.58

WORKING EXPERIENCES

ALLIANCE BANK MALAYSIA BERHAD **AUG 2024 TO PRESENT**
Senior Executive, Application Services - Data Warehouse

- Manage the full System Development Life Cycle (SDLC) for data warehouse solutions, including environment readiness, requirement analysis, SIT, and UAT phases. Conduct requirement analysis to ensure completeness of business and system specifications, supporting procurement and evaluation of system solutions.
- Design and develop Power BI dashboards for Data Quality Management, delivering insights into data accuracy, completeness, and consistency across banking operations.
- Oversee User Access Management (UAM) database administration, including access provisioning, role-based access control, audit trail maintenance, and compliance reporting. Supported internal and external audits by preparing detailed UAM documentation and enforcing best practices in database security and data governance within Data Warehouse operations.
- Maintain comprehensive SDLC documentation aligned with Group Information Systems (GIS) guidelines and regulatory standards.
- Execute corrective and remediation measures related to audit findings, ensuring timely resolution and compliance.
- Deliver reliable on-call support in rotational shifts, proactively monitoring and resolving batch process issues to ensure uninterrupted Business-As-Usual (BaU) operations.

CELCOMDIGI SDN BHD **DEC 2023 - JUNE 2024**
Business Analyst - Reporting and Monitoring (Enterprise Business)

- Involves in ensuring any changes or updates to individual account details are send to the relevant requester or user daily. Tracking and record the daily usage ad revenue generated by enterprise business accounts.
- Compiling and analyzing key performance indicators (KPIs)or indices related to enterprise business.
- Extract data from SQL Tera-data to generate daily, weekly, monthly, and quarterly sales performance reports for Business Managers, facilitating divisional teams in monitoring sales performance.
- Conduct monthly revenue reporting and analysis for management to support renewal and tracking needs. Review revenue figures with management to ensure consistency aligns with financial reports.
- Involve in development of KPI automation dashboards using Power BI and Excel, streamlining the tracking and analysis of enterprise business sales performance.

PETROLIAM NASIONAL BERHAD – PETRONAS DAGANGAN BERHAD **SEPT 2022 – JAN 2023**
User Experience (UX) – Industrial Intern

- Collaborated with the System Support team to maintain TipTop Enterprise via Jira, ensuring smooth operations and timely issue resolution.
- Defined user requirements, crafted detailed User Stories and Wireframes, and actively contributed to Agile sprint planning.
- Co-developed IoT Toolkit dashboards in Power BI, translating complex use case data into actionable insights.

- Conducted user research through surveys and interviews, synthesizing feedback to guide product and design decisions.
- Supported the Scrum Master in facilitating daily stand-ups and bi-weekly sprint reviews to enhance team alignment and delivery cadence.
- Contributed to digital product ideation and enhancement by drafting wireframes, mockups, and isolating design requirements for development briefs.
- Produced comprehensive documentation and presentations to communicate findings and proposals, supporting internal alignment and product continuity.
- Provided UX, IT, and digital systems support, including project tracking and proposing improvements to internal tools and user operations.
- Delivered insights on user engagement and experience impact across web applications, aligning UX strategies with business and operational goals.

KINOCINEMA MEDIA **JUL 2019 – NOV 2019**

Game Developer - Industrial Intern

- Leveraged proficiency in game development and interactive multimedia, specifically with Unity 2D & 3D, to develop modules and products designed for educational use.
- Engage in the development of learning modules for courses such as "Introduction to Real-Time 3D Animation and Motion Capture," "Unity 3D Realistic Rendering and Cinema 4D Training," "Adobe After Effects, Adobe Illustrator, and Adobe InDesign," as well as "Latihan Peningkatan Kemahiran Penghasilan Bahan Pengajaran & Pembelajaran.".
- Assisted the Managing Director as a facilitator for training sessions coordinated by KinoCinema Media.

PROJECTS

- The Zaqiyyah (2022): Educational Unity 3D mobile app instilling moral values in children.
- The Paw Food (2022): Android app with Firebase for cat food and supplement information.
- Soap & Skincare Shop Website (2021): Full-stack e-commerce platform using HTML, PHP, JavaScript, CSS, MySQL.
- Seasonal Run (2019): 3D adventure game teaching attire choices across seasons.e that embeds educational values about suitable types of attires to wear during four different seasons on Earth**.**
