SKILLS

Manual & Functional Testing
- Functional, and regression testing
- Test case design, execution and maintenance.
- Defect identification, documentation and retesting.
- URS, UAT support and validation
- Data validation and migration

Tools & Technologies
- Silktest and Selenium automation testing *(VB .net / Python)*
- API testing using Postman
- Oracle APEX (application testing, validation & development
- DBMS; (MSSQL, Oracle DB, & MySQL)

Programming
- SQL & PL/SQL
- HTML, JS, & CSS
- Python

LANGUAGE

Malay | English

PERSONALITIES

- ✓ Detail oriented and quality driven
- ✓ Strong analytical and problem solving skills
- ✓ Proactive in identifying risk and defects

ABOUT ME

An experience in manual and automation testing, Oracle Apex development, system support and validation, and data migration. Skilled in test case design, defect analysis, regression testing and validating fixes to ensure system meet business requirements. Strong analytical mindset with a technical background in automation, SQL and system support.

WORK EXPERIENCE

UCSI University | Oracle Apex Developer

Jan 2023 - Current

Missions or tasks realized:

- Performed functional testing and system validation for Oracle APEX applications to ensure features met business and user requirements.
- Designed and executed test cases, identified defects, validated fixes through retesting, and supported pre-deployment activities.
- Conducted data validation and migration testing to ensure data accuracy and integrity between source and target systems.
- Analyzed application logs and test results to identify root causes and support issue resolution.
- Prepared validation and testing documentation (UAT, URS support materials) and verified overall system readiness before go-live.

Forest Research Institute Malaysia (FRIM) | IT Executive

Jan 2021 – Dec 2022

Missions or tasks realized:

- Identified system issues through user feedback and reproduced defects through testing and analysis,
- Validation testing to ensure data accuracy and consistency.
- Verified fixes through retesting and ensured issues were resolved before release.
- Supported system updates and maintenance by validating application behavior after changes.
- Supported URS and UAT activities and verified overall system readiness prior to go production

Employees Provident Fund (EPF) | Automation Tester

Sept 2019 - Sept 2020

Missions or tasks realized:

- Developed and executed automation test scripts using Silktest (VB.Net) for web-based applications.
- Performed regression testing to ensure system changes did not impact existing functionalities.
- Analyzed automation test results, identified defects, and worked with developers to verify fixes.
- Assisted in defining test scenarios, execution plans, and test data preparation using MSSQL.
- Analyzed application logs and test results to identify root causes and support issue resolution.

EDUCATION

Bachelor of Computer Science (Hons.) Netcentric Computing
UiTM Shah Alam
2017 – 2019

Diploma in Computer Science
UiTM Raub, Pahang
2014 – 2016
